## SECRET,

25X1 brigade went to Moscow, received ammunition and equipment and then was assigned to an unidentified tank corps; saw action with this corps; 1st Colonel Virikanov (fnu) and battalion commissar Burov (fnu) in the area of Voronesh; was sent to the area of Verkhni-Maman on the upper Don River in October 1942; was transferred to the area of Pavlograd in February 1943; was transferred to the Paisov area, Czechoslovakia, on 9 May 1945, after fighting in Germany; was transferred to Austria in July 1945; was sent to Cranienburg, Germany, in November 1946 and, in February 1949, went to Prenzlau where the brigade was reorganized into a tank regiment in April 1949. The brigade was employed at Voronesh, Stalingrad, Lozovaya, Orel, Kursk, Konotop, Kiyev, Novograd, Volynski (Tsviahel), Dubno, Brody, Yaroslau Irtsemysl,..... and some other places including Luckenwalde. 25X1 the barracks installation southeast of Berliner Strasse quartered two tank units and one 25X1 artillery unit. They allegedly were the units which had left for Templin in April 1952. They were subordinate to a headquartere in Cranienburg. Lajor Zeryonov's unit received about 200 recruits in early December 1952. 25X1 the other units had also received recruits. no field training activity, however, personnel were engaged in overhauling their weatons. A total of 14 x 76,2-rm SIS-3 AT guns, an unidentified number of T-34 and SS guns and 120-mm mortars were in the barracks 25X1 The barracks installation northwest of Derliner Strasse quartered a tank unit. This unit had also recieved recruits. 25X1 Conment. The information indicates no changes in the occupation of 25X1 the two barracks installation in Frenzlau. barracks installation southeast of Berliner Strasse quarters only a tank 25X1 unit, ramely the 175th Tank Regt of the 25th Tank Div and probably two artillery units, namely the unidentified Fort Regt of the division and the 296 Gds AT Arty Regt. For the assignment of this regiment 25X1 Comment 2 of this report. The officers mentioned were previously reported as supply officers. the 296th Gds AT Arty Rogt during Corment. 25X1 world War II. carried with the 11th Gas AT Arty Brig. however, since 12 October 1944, the regiment was apparently assigned to the XXV Tank Corps and remained with this corps. It is therefore believed that, after World War II, the regirent remained a component of the division after the tank corps was redesignated into the 25th Tank Div. This assumption is to some extent supported by the quartering of the unit along with units of the division in Frenzlau. Faragraph 2 of the present report as well as previous observations tended to indicate that the regirent is equipped with SIS-3 76.2-rm guns. It is not clear, however, what missions are exercised by the regiment as component of a tank division since; according to previous observations, tank divisions have no AT artillery regiment.

SLORET,

Frevious information on the other hand tended to indicate that the un

25X1

identified howitzer artillery regiment of the division was stationed in Oranienburg and thus is not identical with the 296th Gds AT Arty Regt. It is therefore impossible to make a definite statement on the T/E and the assignment of the regiment. A previous report indicated that the barracks installation scutheast of Berliner Strasse quartered four units.

The fourth unit ellegedly also is an artillery unit which, however, is still unidentified. The separation of the 296th Gds AT Arty Regt from the 11th Gds AT Arty Brig on 12 Cotober 1944 conflicts with records from world War II which indicate that, on 9 February 1945, the regiment was subordinate to the brigade. It is probable, however, that the information is correct.
